1300 SHEDBOSS

Why choose Shed Boss?

We take pride in our work and it shows!

At Shed Boss we have one simple philosophy - it doesn't matter how little or how much you're spending, you deserve the best.

We only use the latest fabrication technology, first class materials, world class designs and the best qualified tradespeople.

At Shed Boss we are committed to provide the best service to our customers, whether it's a free site inspection, advice on design, layout, positioning, council regulations - whatever help you may need - it's all hassle-free when you deal with Shed Boss.

'The Morinda™ Knee Joint'

This incredible invention allows for a more stable and strong Knee Joint due to its full wrap around and use of heavy bolts and screws to fix it.

'The Morinda™ Apex Joint'

Similar to the knee, the Apex Joint's enhanced strength and rigidity is achieved with the fully wrap around 'Morinda™ Glove Section' which connects both the web and the flanges of the truss and column. As with the knee, the pre-punched hole centres allow for huge time saving during installation.

Footing Brackets

These massive heavy duty galvanised hold down brackets cast into slab, allows portal frames to simply swing up into position. This ensures that your building is properly secured to the foundations.

The Shed Boss Complete Project Process

Daydreaming about a brand new, stylish, sturdy shed for your home or business? Maybe a garage, workshop, barn, awning or carport is on your mind? Frankly, in today's busy world, it can be difficult to find time for handling the entire process from conception to completion. This is where the Shed Boss Complete Project Process comes in.

OUR COMPLETE PROJECT PROCESS

We are passionate about both customer service and quality design, and have created the Complete Project Process to deliver both to you. As part of this offering, we manage the entire project for you, right from the initial quoting stages to handing over the set of keys to your shiny new steel building.

Colorbond®

You can choose from any combination of the colours from the COLORBOND® steel range. This ensures your garage or shed will perfectly match the colours you have chosen for your home's COLORBOND® steel roof, fence and gutters.

SHEDSAFE Accredited

ShedSafe is a new industry benchmark for Australian manufactured steel sheds. It is an independent accreditation program designed to assist shed buyers in making an informed purchase decision. ShedSafe accreditation means that both the shed manufacturer and seller are committed to ensuring sheds meet Australian Standards and are the best fit for your site and circumstance.

Bluescope Steel Guarantee

Shed Boss only uses Australian BlueScope steel for all the structural components of your buildings.

Sheds & Garages

AUSTRALIA'S GARAGE AND SHED SPECIALISTS

Our Australian-made steel sheds and garages are built by qualified tradespeople using premium materials and an unparalleled standard of workmanship. Good looking and durable enough to withstand the unique demands of our environment, your garage or shed from Shed Boss will add value to your property and space to your life.

We manufacture sheds and garages in a variety of span widths, with front and / or side entry, windows and optional roller doors. Your local specialists will guide you through our wide range of engineered garage and shed designs, door types and COLORBOND® steel colours to custom plan a garage or shed that suits your individual space and price needs, while meeting Australian Standards and Council regulations.

Skillion

If you are designing a custom residential or commercial shed, choosing a skillion roof is ideal as it gives a very stylish, edgy look that can better match modern houses and commercial buildings.

One of the great things about a Shed Boss shed, or any other one of our structures including garages and workshops, is that they can all be custom designed to your preferences.

At Shed Boss, we use our industry-leading Morinda™ Glove Section Bracket System to engineer the skillion roof pitch so it can vary in degrees. This flexibility gives you freedom to pick an angle custom to your needs, all the while offering a sophisticated, seamless design.

Client Testimonial

"We needed a multipurpose shed- something we could use for storage and as a workshop. We shopped around but in the end the reason we chose Shed Boss was for their professionalism - they weren't pushy, they made us feel comfortable and the service was outstanding from the first visit until the keys were handed over. We have already recommended Shed Boss to our family and friends, we can't speak highly enough of them"

Workshops

Workshops for acreage properties or your individual business needs

Versatility is the key to our range of engineered workshops that can be custom designed to suit virtually any domestic or commercial purpose.

We understand that every workshop has different needs, so we will work with you to customise a layout and features that suit your exact requirements and location.

For instance you can decide whether you need multiple sized bays and exactly how many are required, whether you need covered work spaces or any other specific workshop requirements. You can choose the number and preferred location of entry doors and windows, whether you need roller doors and how many, and so on.

At Shed Boss we are experts at custom designing and building:

- Mechanical workshops
- Marine workshops
- Panel beating workshops
- Commercial showrooms and retail spaces
- Workshops for acreage properties
- Storage workshops for large vehicles, boats, caravans or trailers

Visit your nearest Shed Boss workshop showroom to view our designs. While you're there, speak to one of our workshop specialists who'll offer expert advice on domestic and commercial workshop layouts, as well as planning and permit obligations to suit the location and intended purpose of your workshop.

Barns

PREMIUM RANGE OF CLASSIC AND MODERN BARNS

An eye-catching heritage-style barn from Shed Boss is a fantastic addition to any farm, acreage or larger residential property.

Built using premium quality Australian steel and the patented Morinda™ Knee and Apex Joints, our barns are used as shearing sheds, calf sheds, horse stables, workshops, storage, animal husbandry or even residential living.

Our traditional-style Stockman Barn is in fact one of our most popular and versatile steel buildings, available in a range of colours, heights and span widths.

Client testimonial

"We would highly recommend Shed Boss, the whole experience was made easy by the team and they really listened to what we wanted"

Burt & Dorothea

Garaports

Shed Boss garaports combine the security of a garage and the versatility of a carport all under the same roof, with your choice of our contemporary skillion or traditional gable roof.

Our professionally engineered range of garaports are built using premium COLORBOND® steel products and will withstand Australia's demanding environment.

A garaport is the ideal solution for:

- Caravans, boats and trailers as a higher clearance can be achieved in the open section
- Creating an additional outdoor entertaining area
- Adding value to your property by creating additional undercover storage area

Client testimonial

"Shed Boss were flexible and prepared to work with me on my custom project. ShedBoss took the hassle out of building a shed - they took care of everything from the design to council approval to building the shed. It was a stress free experience and we love the end result."

Mauro & Maria

Carports

CUSTOM CARPORTS FOR EVERY APPLICATION

Select from a wide range of COLORBOND® Steel colours, then we'll customise a professionally-engineered flat roof (Skillion roof) or gable roof carport that compliments the colour and profile of your home, shop or commercial building.

You can build your Shed Boss carport yourself from our plans or our qualified tradesmen will build it for you, handling all the necessary approvals along the way.

Our durable, low maintenance carports are ideal for diverse uses including:

- Car, bike and motorbike parking/storage
- Boat or caravan storage
- Covered recreation areas
- Standalone outdoor entertainment areas
- Pergolas
- Commercial vehicle fleet parking/storage
- Boat and marine craft storage
- Plant, equipment and machinery storage
- Staff, customer or tenant parking
- Shelter for shop fronts and
- Outdoor retail displays

Commercial & Industrial

FOR THE DISCERNING INVESTOR OR SMALL BUSINESS OPERATOR

Shed Boss custom design and build large, high quality commercial sheds for everything from sporting facilities to factories, school buildings and even aircraft hangars!

We offer a comprehensive commercial shed design and building solution from initial concept and quotation to lock-up stage.

Our licensed builders and qualified tradespeople can take all the hassle out of your commercial project, gaining all relevant permits and approvals then fully managing construction.

Whether delivered in kit form or constructed by our specialist team, your commercial building will be good looking and economical, will add value to your commercial property, meet all Australian Building Standards, and will withstand the test of time and Australia's climate.

Rural

Expansive durable multi-purpose sheds are essential on rural acreages and farms. The team at Shed Boss offers unmatched experience in the design and construction of buildings to suit any farming needs and any location.

Built strong to last, our range of Australian-made rural sheds utilise premium quality steel products and galvanised Morinda™ brackets and joints to truly withstand the rigours of farm life and Australia's often harsh climate.

Our professionally engineered rural shed designs can be modified to include roller doors, sliding doors, windows and more. Features include standard 6 metre bays, high eaves, clear span flexibility (no messy internal columns), and options for open or closed bays.

No matter where you are or how large your requirement, your local rural construction specialists can custom build a shed or steel structure to suit your exact rural purpose and location:

- Hay sheds
- Plant equipment and machinery sheds
- Shearing sheds
- Piggery, dairy and poultry sheds
- Fertiliser and grain storage sheds
- Barns
- Stables

WHY CHOOSE SHEDBOSS?

Shed Boss will pro-actively communicate with you throughout the entire construction process. You will always know the status of your building project. Our focus on listening and communication ensures we provide you with a premium experience. The entire process from design, certification and construction can be quite involved and as a Shed Boss customer, these complexities are taken care of by our team. We deliver more than just a shed, we provide you with peace of mind so you can continue on with your daily commitments.
